

Introduction

Article Management System (AMS) was conceived for support the entire process of Publishing Scientific Articles using internet technology. From submitting to publish AMS support all perspectives of a complex process through an structured workplan in order to assure a well-managed project and achieve high quality publishing result on schedule.

After you submit your article AR staff check for interesting, standard compliance and english adequacy.

Here they do an in deep evaluation and prepare a detailed feedback about your article.

Your article is published at AR magazine,also on internet, and archived for future reference.

In this phase you work with reviewers and editors to improve content, english and form in order to achieve high quality publication.

Overview of publishing process

Features

- All you need to run is a compatible web-browser and an internet connection
